

ACCUWEIGH

Onboard and Vehicle Weighing Systems

WasteWeigh

Onboard weighing for refuse collection vehicles

Environmental Solutions

With the ever-increasing expansion of the waste refuse and recycling industries, Accuweigh Onboard and Vehicle Weighing is at the forefront of waste management solutions.

Integrated weighing systems are specifically designed for waste and refuse collection vehicles. These systems provide continuous and precise weight information for payload control and operational efficiency to accuracies better than $\pm 1\%$. Accuweigh can provide a software package for management reporting with route information for recycling credit calculations by weight.

- High accuracy $\pm 1\%$ FSD or better
- Tare, gross and payload displayed
- Overload alarm, audible or visual
- Printer option
- Proven reliability
- GPS, GPRS, GSM technology

PM1155 Digital Weight Indicator

The PM1155 onboard digital indicator is a versatile lightweight display designed to suit a wide variety of operations from 3.5 tonne to 50 tonne GVW. Incorporating the latest in microprocessor technology, the PM1155 can communicate with a host of computer devices via the RS232 port. This enables operators to gather and store weight data for analysis or to integrate with existing computer systems.

PM30945 Loadcell

System for 4-, 6- or 8-Wheel Vehicles

WasteWeigh systems incorporate loadcells positioned between the container/body and the vehicle chassis. Weight loaded onto the vehicle is displayed by the in-cab PM1155 digital indicator and is represented by tare, gross and payload information. Printer options provide individual ticket printouts of loaded weight and delivered weight.

- Rear End Loaders
- Front End Loaders
- Hook Loaders
- Roll-on-offs
- Sludge tankers
- Recycling Trucks
- Side Loaders
